**Art Unit: 1773** 

## **DETAILED ACTION**

1. This office action is in response to the amendment/arguments dated 10/08/2004. Applicant's amendment does not substantially change the scope of the claims, but the applicant's arguments are deemed persuasive. Accordingly, all of the previous grounds of rejection are hereby withdrawn. However, the case is not in condition for allowance in view of some minor objections and 35 U.S.C. 112 2nd paragraph issues presented below. Once these issues are corrected, it is likely that the case will be passed to issue (please see examiners note below).

## Claim Objections

- 2. Claim 3 objected to because of the following informalities: Applicants claim various types of polymers by their acronyms (i.e. PMMA instead of polymethyl methacrylate). To prevent confusion, a polymers full name should be utilized when possible, as not all polymer acronyms are universally recognized. This is in contradistinction to universally recognized acronyms, such as ASTM (known in the art as American Society of Testing and Materials). Appropriate correction is required.
- 3. Claim 17 is objected to because part c) of the resin recites "5 40% by weight." This should read "5-40% by weight." Appropriate correction is required.

## Claim Rejections - 35 USC § 112

- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

  The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 5. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant

Application/Control Number: 09/480,193

Art Unit: 1773

regards as the invention. Claim 6 requires 5-60% by weight crosslinked particles comprising 0-100% by weight styrene, 0-100% by weight alkyl methacrylate, and 0-100% by weight alkylacrylate and crosslinking agent. According, claim 6 is open to particles having 0% of each of the recited components. However, claim 6 is dependent on claim 1, which requires a non-zero value for each of the components of the crosslinked particles. Correction is required.

## Allowable Subject Matter

- 6. Claims 1, 5, 10-11, and 14-16 allowed.
- 7. The following is a statement of reasons for the indication of allowable subject matter: the closest prior art to that of claims 1 and 16 is US4876311 to Hennig. While Hennig does teach particles have a substantially similar composition as those of the claimed invention, Hennig does not teach the claimed particle size distribution or minimum surface roughness. Further, there is no teaching or motivation to one of ordinary skill in the art to modify Hennig so as to arrive at the claimed invention.

#### Examiners Note

8. The examiner apologizes for any inconvenience caused to the applicant by having them make these minor corrections via conventional amendment practice.

Typically, the examiner would call the applicant in order to try and correct these issues via examiners amendment. However, the examiner's last day at the USPTO is on December 30th, 2004. As a result, the examiner felt that these issues could be best handled via standard amendment practice, where time is not so substantially of the essence.

Application/Control Number: 09/480,193

Art Unit: 1773

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nikolas J. Uhlir whose telephone number is 571-272-1517. The examiner can normally be reached on Mon-Fri 7:30 am - 5 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Deborah Jones can be reached on 571-272-1535. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
